Question 6:

Create a Cognos Story for NovaTech's Quarterly Sales & Service Review:

Scene 1 — Brand Performance Overview,

Scene 2 — Top & Bottom Selling Models by Region,

Scene 3 — Return Rate Analysis by Model & Channel,

Scene 4 — Service Center Efficiency & Issue Resolution,

Scene 5 — Customer Satisfaction Trends,

Scene 6 — Recommended Actions to Reduce Returns & Improve CSAT.

Objective:

To create a Cognos Story analyzing quarterly sales, returns, service efficiency, and customer satisfaction for better decision-making.

Steps Performed:

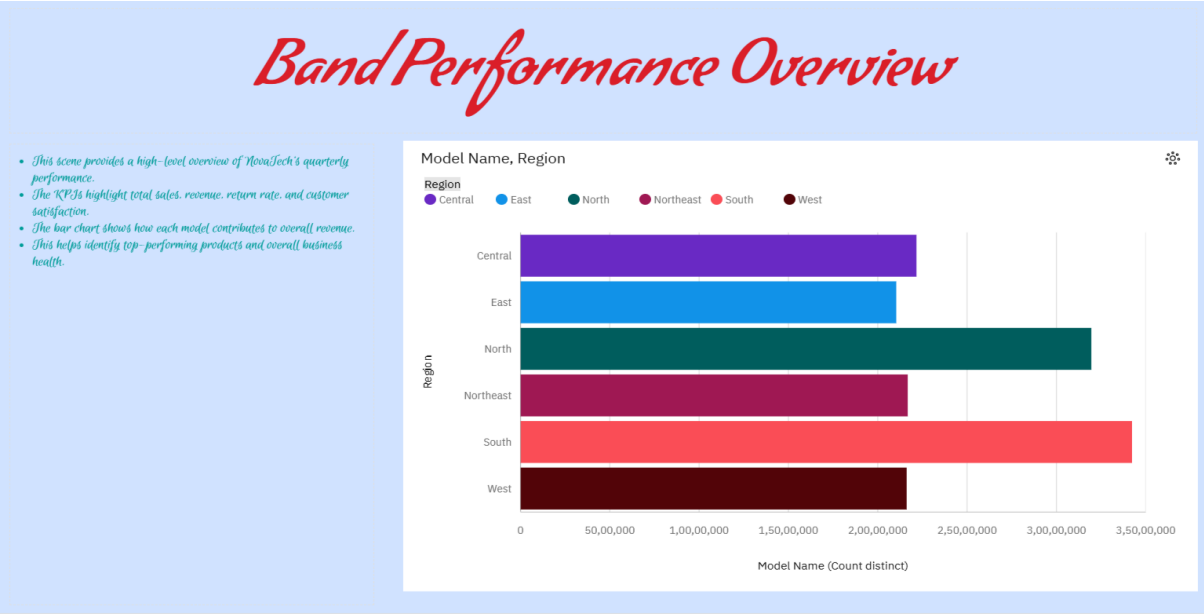
- Open Cognos Analytics → Story and load the dataset.
- Create Scene 1 with KPI visuals for overall brand performance.
- Add Scene 2 with charts for top and bottom selling models by region.
- Add Scene 3 with return rate analysis by model and sales channel.
- Add Scene 4 with service request data and resolution time analysis.
- Add Scene 5 with customer satisfaction trend charts.
- Add Scene 6 with insights and recommended actions.
- Arrange visuals, add titles, and include short descriptions for each scene.

Final Output for each Scene :

Story Title:

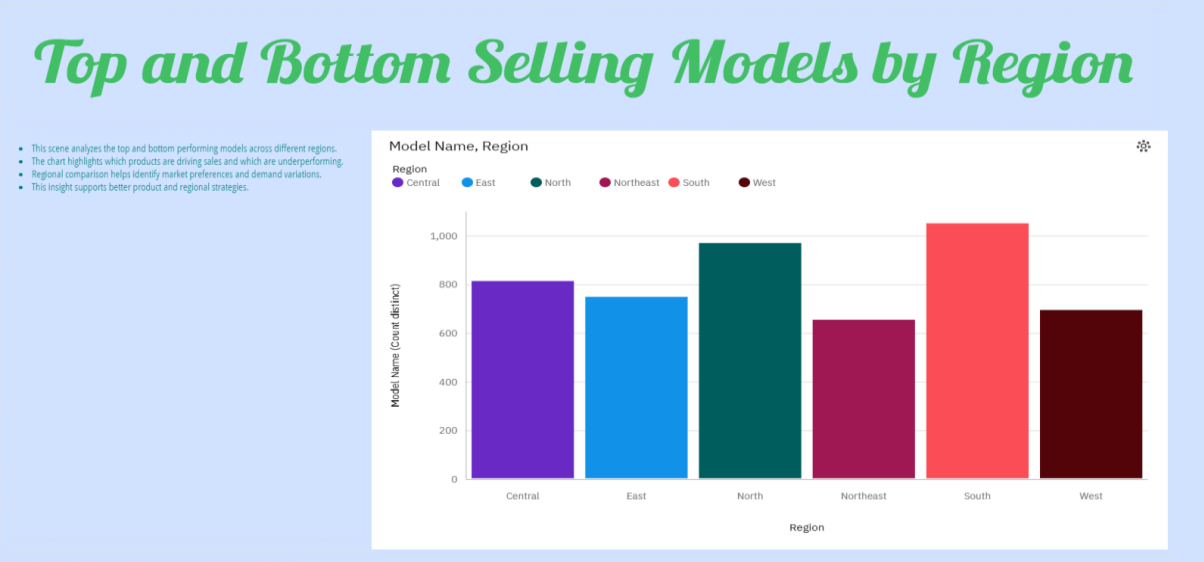
SCENE 1 - *Brand Performance Overview*

This scene shows overall sales, revenue, and return rate of NovaTech.It provides a quick summary of business performance for the quarter.



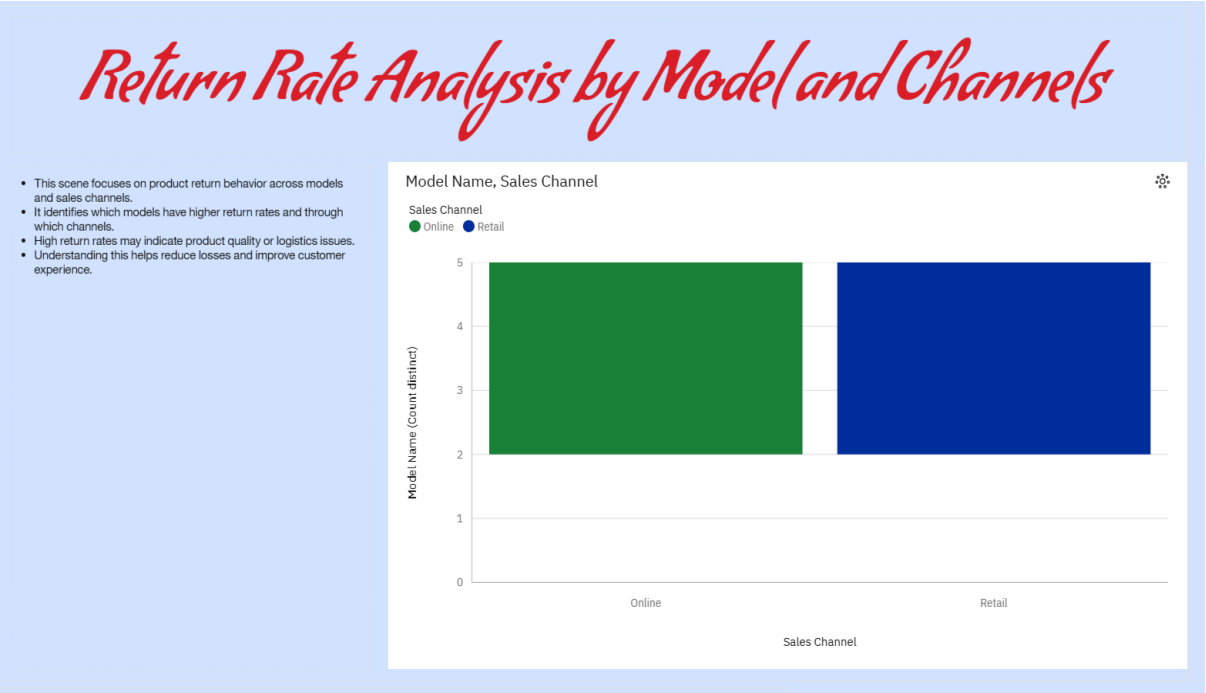
SCENE *2 - Top & Bottom Selling Models by Region*

This scene highlights the best and worst performing models across regions.It helps identify high-demand and low-performing products.



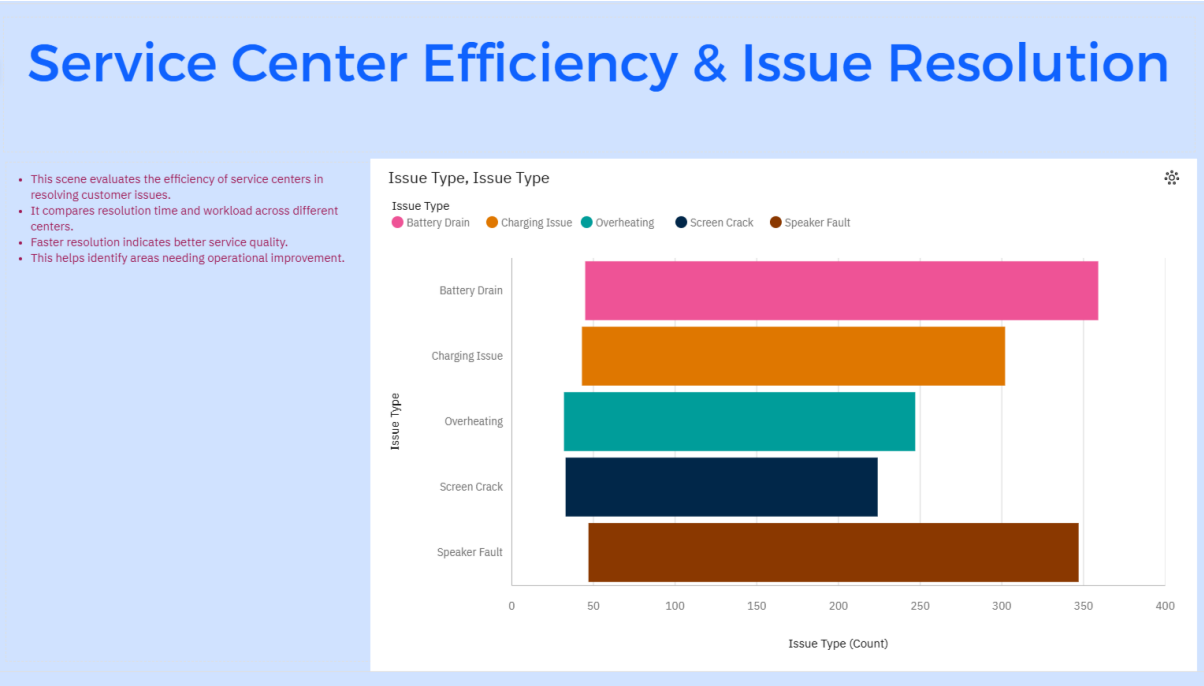
SCENE 3 - *Return Rate Analysis by Model & Channel*

This scene shows return rates for different models and sales channels.It helps understand which products and channels have higher returns.



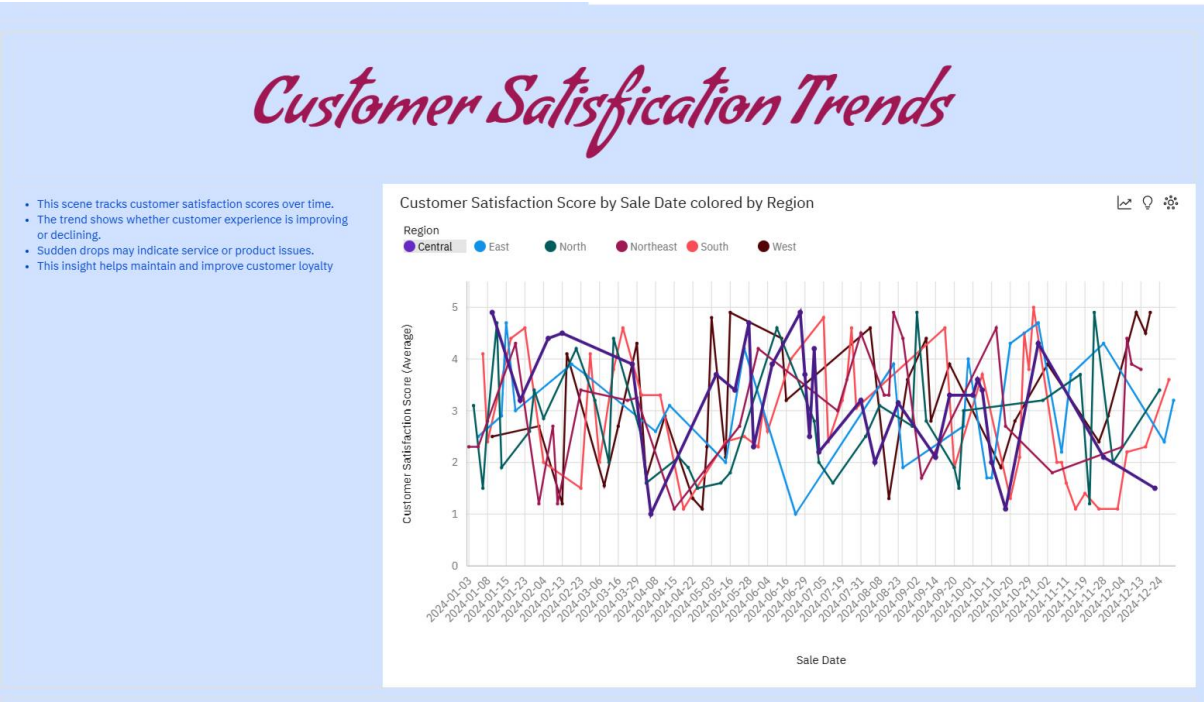
SCENE 4 - *Service Center Efficiency & Issue Resolution*

This scene analyzes service requests and resolution time.It helps evaluate the efficiency of service centers.



SCENE 5 - *Customer Satisfaction Trends*

This scene displays trends in customer satisfaction scores over time.It helps track improvement or decline in customer experience.



SCENE 6 - ***Recommended Actions to Reduce Returns & Improve CSAT*.**
